

synensys™

Global Healthcare Consulting

For over a decade, Synensys has been a highly acclaimed international advisor & trusted partner to more than 500 healthcare organizations in 14 countries.

Synensys uses an evidence-based approach to create highly effective care delivery models resulting in high-value patient centered population health. Our success is grounded in the Synensys Systems Strengthening Framework (S³F), which includes Issues & Evidence-Based Theory of Change Models, Results-Based Monitoring & Evaluation Systems, Sustainable Innovative Solutions, and sound Change Portfolio Management Practices that promote Value for Money. Synensys clients are able to transform isolated pockets of excellence into integrated, high-performing systems of care that are flexible, adaptable, and responsive to healthcare stakeholders' diverse needs.

Results:

- Maximized Value for Money
- Structured Health Systems Strengthening
- Integrated Patient-Centered Care
- Enhanced Resilience of Systems and People
- Increased Safety and Quality

Top 6 Client Requests:

1. High Reliability Organization Development (HRO)
2. Healthcare System Transformation
3. Healthcare Performance Monitoring & Evaluation and Public Reporting
4. Healthcare System Change Portfolio Management
5. Disease Management Framework and Program
6. Antimicrobial Resistance Strategies & Execution Plans and Stewardship Programs
